Show-N-Tell @ 7:15 pm
Meeting @ 7:30 pm

Our January meeting is taking a page from what other societies do when a speaker is just not available.

We will be showing a movie produced by the American Orchid Society. The theme for the movie is “Dendrobiums”. It has been a very long time since we have had anything informative about these wonderful orchids so this should be a real treat.

den-DROH-bee-um

Dendrobium is a diverse genus of orchids with different cultural needs. Many go through a growth phase and then a rest phase during the course of one year, and must be given water and temperature to match these periods of growth and rest. Flowers can last one day to many weeks, depending on the type. Owing to the extreme diversity of the genus, we have categorized culture according to the following main types:

PHALAENANTHE Evergreen for several years, with thin, tall pseudobulbs, terminal inflorescences, usually appearing in the autumn or twice a year (see culture). Species such as Den. affine, Den. bigibbum (phalaenopsis), Den. dicuphum and Den. williamsianum.

December Show-N-Tell Winners

Are you a member of the American Orchid Society? If not, please check out all the wonderful things you will find on their website. Everything from culture sheets to general information about events happening around the globe. Our society is a member and we enjoy many benefits from this. AOS judging centers are located around the Southland so you can take your orchid plant to be judged. Who know, you may win an award for all your hard work.

Enjoy having some refreshments?

Bring a treat and receive a free raffle ticket for the general raffle. Both snacks and beverages are most welcome.
